

Applied Chemicals International Group
Technical Service is our Success

Specialty chemicals

for the paint, coatings, adhesives, plastics, building materials and many other industries

chem [] tech

acat.com

Additives and specialty chemicals for numerous industries

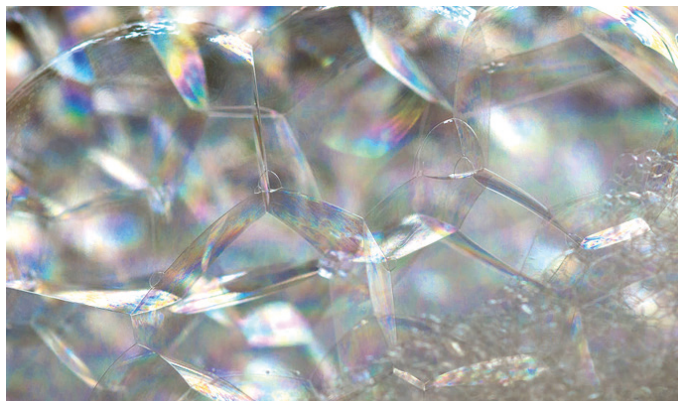

We stock a wide range of additives and specialty chemicals for various applications ready for you. Our products are usually available at short notice and in many packaging units. They are used in the paint and coatings industry as well as in the adhesives, building materials, plastics, and many other industries and sectors.

Defoamers

For aqueous or partially solvent-based systems

We have a comprehensive range of defoamers and deaerators. Based on different chemical structures - such as natural vegetable fats, mineral oils, polysiloxanes, or polyoxyalkylene - our products are also suitable for aqueous systems and in some part also for solvent-based systems. They are preferably used in the paint, building material, and adhesive industry, but are also suitable for many other applications.

Powder Additives

Defoamers, wetting/dispersion agents and anti shrinking agents

Whether for use in putty, joint, or leveling compounds, whether in screed or mortar, we offer all standard powder additives, which are used primarily in the construction and adhesive industries.

Wetting/Dispersion Agents, Leveling Additives

Various chemical bases

Our products offer a huge range of wetting and dispersing agents on different chemical bases. Our products are suitable for a variety of applications. These range from use in paints and coatings to many other areas of industrial applications.

Mineral Flame Retardants

Product palette with many applications

We offer you the choice between a wide range of products that are suitable for a variety of applications. They are increasingly being used in the wood panel industry, but also in the cable, rubber, and plastic industry.

Thickeners and Rheology Additives

Various chemical bases

We offer a variety of thickeners and rheological additives on different bases such as polyurethane or polyacrylate and other polymers. For whatever purpose - just ask us. We are sure to find the right product for you.

Amorphous Silica Gel

Synthetic micronized silica gel for various applications

Silica gel is used, for example, as a matting agent in paints and coatings, as an anti-blocking agent for films, as a catalyst carrier, and in many other applications. We offer synthetic, micronized amorphous silica gels with high porosity and high purity, including coated variants.

Pigments and Fillers

For a variety of applications, we provide you with different types of fillers and pigments.

Pigments:

- Organic/inorganic pigments and pigment preparations
- Dyes

Fillers:

- Mineral fibers
- Magnetite
- Mica
- Lithopone, Blanc Fix and Barium Sulphate

Agricultural Products

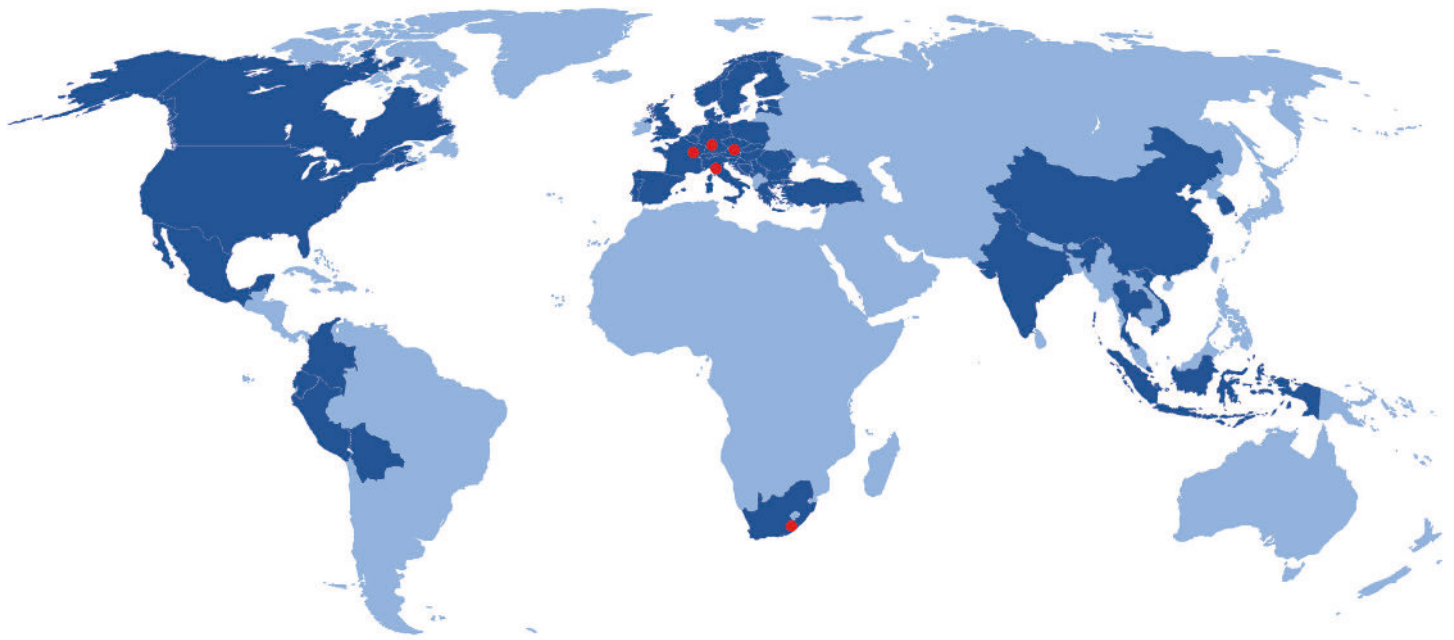

Organic soil improvement additives

The SoilStar product line consists of organic soil conditioners based on polyacrylamide. These anionic water-soluble polymers have a high molecular weight.
